Position: AI Developer (Fresher)

Location: Ahmedabad, India

Experience: 0–1 year of relevant experience

### Job Description:

We are looking for curious, enthusiastic, and driven individuals to join our technology team as AI Developers. This is an exciting opportunity for freshers to gain hands-on experience in building intelligent applications using machine learning and deep learning technologies.

### Key Responsibilities:

Assist in the design, development, and training of machine learning models across various projects  
Handle structured and unstructured data; perform data cleaning, transformation, and preprocessing  
Collaborate with software engineers and data scientists on end-to-end AI/ML solutions  
Implement algorithms and fine-tune models to improve accuracy and efficiency  
Stay up to date with the latest advancements in AI and explore emerging tools and platforms

### Required Skills:

Solid understanding of Python and core libraries such as NumPy, Pandas, TensorFlow, or PyTorch  
Basic knowledge of machine learning concepts (e.g., regression, classification, clustering)  
Familiarity with generative AI platforms and tools  
Understanding of data preprocessing techniques and model evaluation metrics  
Strong problem-solving mindset and the ability to work effectively in a collaborative environment  
Good communication skills and a willingness to learn

### Qualifications:

Bachelor's Degree in Computer Science, Artificial Intelligence, Data Science, or a related field

### Apply Here:

Position: Application Developer – Microsoft Analytics

Location: Coimbatore, Tamil Nadu, India

Your Role and Responsibilities

As an Application Developer specializing in Microsoft Analytics, you will be involved across the full software development lifecycle—from design and coding to testing and support. Your work will contribute to building innovative software solutions that support our clients' hybrid-cloud and AI transformation journeys.

Key Responsibilities:

Expertise in Microsoft Technologies: Leverage your proficiency in Microsoft development tools and technologies to deliver high-quality, high-performance software solutions.

Stakeholder Collaboration: Work closely with business stakeholders to gather requirements, address challenges, and deliver strategic software solutions through strong analytical and problem-solving skills.

Continuous Learning & Integration: Stay current with evolving Microsoft technologies and best practices, integrating them into projects to enhance functionality, performance, and maintainability.

Preferred Education:

Master's Degree in Computer Science, Information Technology, or a related field.

Required Technical and Professional Expertise:

Align change management strategies with broader organizational or project objectives.

Apply Organization Change Management (OCM) frameworks and tools to design and execute change strategies that support user adoption and transformation success.

Software Platform Engineer I

Role Overview:

We are seeking a hands-on engineer to contribute to the design and development of AI-driven applications using both established and emerging technologies. This role is ideal for someone passionate about building scalable AI solutions and collaborating across diverse teams.

Key Responsibilities:

Design and develop AI applications and platform components with a strong focus on performance, scalability, and maintainability.

Partner with product managers, data scientists, and other stakeholders to translate business needs into effective technical solutions.

Contribute to the execution of the AI technology roadmap, ensuring alignment with broader business goals and industry trends.

Stay current with advancements in AI and machine learning, recommending and integrating best practices and innovative methodologies.

Participate in cross-functional collaboration to accelerate AI adoption and delivery.

Investigate, troubleshoot, and resolve production incidents, problems, and service requests to maintain system reliability and performance.
